MGT Europe NETSCOPE 1 Non Linear Junction Detector

Concealed Electronics Detection Device

- Detects all types of concealed electronics
- Cell phones, Remote Controlled Improvised Explosive Devices (RCIED), wired/wireless radio-mikes, sophisticated spy microphones, bugs, A/V recording devices
- Detects devices whether active, passive or switched off
- Dual frequency capability – The only NLJD with this capability
- 880 MHz - Ideal for searches in concrete structures or humid soil
- 2.4 GHz Probing Frequency - for luggage inspection or detecting SIM cards

TECH TIP

Uncover Concealed Threats with a Non-Linear Junction Detector - Securing sensitive areas means more than deploying devices—it's about finding hidden ones too. The Non-Linear Junction Detector locates concealed electronics, even when powered off, helping you stay one step ahead of unauthorized monitoring.
