

B SERIES

Video Devices

B SERIES

The B Series devices represent the culmination of years of experience in the installation and concealment of video devices, providing unparalleled support to Law Enforcement and Intelligence Services departments. Their meticulous design makes them the ideal choice for missions that require discretion, precision, and real-time information.

Key Features:

- **Front axis movement for concealment:** The innovative front axis movement allows for discreet placement even in very small openings within various objects. This fundamental feature provides the ability to conduct high-quality undercover surveillance operations.
- **Integration with MH3 mobile device:** The B Series cameras are designed to offer full compatibility with the optional MH3 device, enabling real-time event streaming. This integration ensures that all events are transmitted instantly and efficiently, ensuring seamless communication.
- **The panning system is fully controllable from a Command and Control Center.** Video presets can be set, fileover management is available in case of signal loss during transmission, ensuring reliability of the camera even in hostile conditions.

Thanks to their brilliant performances, B Series cameras represents indispensable ally in various situations. When the mission demands the highest level of reliability, discretion, and real-time responsiveness, B Series cameras are the right choice.

KEY BENEFITS

- Front axis movement for camouflage allows discreet placement in very small openings
- Ideal for undercover surveillance operations
- Integration with the MH3 mobile device
- Possibility to set video presets
