

As we close out the year, we want you – our valued customer – to know we appreciate you. Each product in this newsletter was selected to help you meet real operational challenges, whether you need cameras for effective concealments, reliable tracking devices, or fast and secure connectivity, we have you covered.

Email us at info@vcasecurity.com to learn more about any of the products we offer.

FEATURED PRODUCTS

iPS Visionary Intelligence - B-Series PTZ Camera

Each B-Series PTZ concealment camera can pan on 2 axes by moving in a single point. The front-pivot pan/tilt design minimizes the viewing-window size in concealment housings, improving discretion while maintaining image clarity and range. Powered by a 1/1.8" Sony CMOS sensor and 60x optical zoom, it delivers high-resolution imagery even in low light.

Features

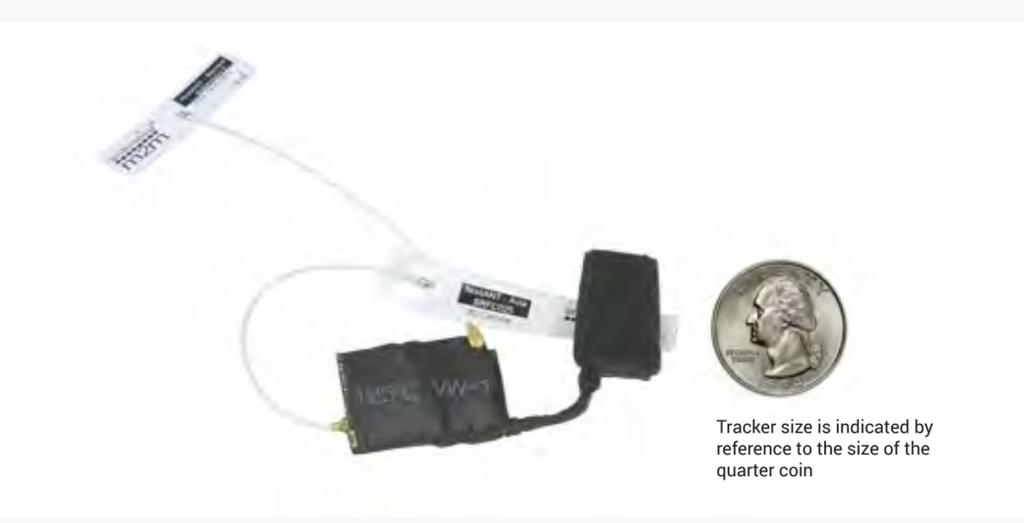

- Front axis movement for camouflage, allows discreet placement in very small openings
- Ideal for undercover surveillance operations
- Possibility to set video presets
- Integration with the MH3 mobile device *

*MH3 mobile device is a handheld field controller used for live video viewing and remote PTZ control of the B-Series camera.

Specs

- Sensor: 1/1.8" Sony CMOS
- Resolution: 50 Hz, 25fps@2MP, 1920x1080 / 60Hz, 30fps@2MP, 1920x1080
- Day/Night: Auto IR
- Lenses: 10mm-600mm / 60x Optical Zoom
- Compression: H.265/H.264 - H.264H/MJPEG
- Storage: Up to 1 TB
- Dimensions: 178/77.483.5 mm

Gedion - Sha-Ked Tracker

This compact, low-profile, miniature GPS/RF tracking and communication device combines satellite, cellular, and RF technologies to maintain accurate tracking even in challenging environments or denied areas. Built for tactical and law enforcement use, it offers encrypted communication, extended battery life, and flexible mounting for vehicles, assets, or personnel.

Features

- Integrated accelerometer for motion-triggered tracking and activity detection.
- Operates in Online Mode for live reporting or Accumulation Mode for data storage in denied areas.
- Automatic switching between satellite, cellular, and RF networks to maintain connectivity.
- Two-way communication for remote configuration and command execution.
- High-sensitivity GNSS receiver ensuring accuracy even in low-signal or obstructed environments.

Specs

- Multi-mode comms: GSM, Iridium, and RF
- Power: rechargeable Li-ion, multi-day runtime
- GNSS: GPS/GLONASS tracking
- Operating range: global, with fallback modes
- Encryption: AES-256 secure communications
- Operating temperature: -20°C to +60°C

IP Technology Labs - FastLane 7400 Series Cellular Gateway

This secure cellular and Wi-Fi gateway is purpose-built for remote and covert operations. Designed for easy, always-available, reliable access to connected systems, it keeps networks up whether wired or wireless. With its extended temperature range, it's ideal for surveillance, IoT, and field deployments that need to connect anywhere - even in harsh conditions.

Features

- Integrated LTE CAT4 Cellular Module
- Dual Nano (4FF) SIM slots with door cover protection
- Five 1Gb Ethernet ports
- Wi-Fi 6 with 2.4/5.8GHz to 1.2Gbps
- Extended Temperature Range from -20 to +70C
- Extended Power input 9-34VDC
- Fully remote manageable in-band and out-of-band

Specs

- Operating temperature: -20°C to +70°C
- Power input: 9–34 VDC
- Cellular: LTE Cat4, 3G/2G fallback
- Wi-Fi: 2.4/5.8GHz, up to 1.2 Gbps
- Ethernet: Five 10/100/1000 Mbps ports
- Dimensions: 5.5" x 4.0" x 1.6" (approx.)

SOLUTIONS WE PROVIDE

- Cameras
- Concealments
- Covert Equipment
- Fiber Optic Transmission
- Interview Room Systems
- Monitors & Video Walls
- Night Vision / Thermal
- Physical Security / CCTV
- Tagging, Tracking & Locating (TTL)
- TSCM / NLJD
- UAS / C-UAS
- Video Compression
